

Apple IPHONE Installation Guide

Getting Starts

Setting up the DVR:

Before you connect to your DVR with Aplayer, please make sure you have the correct settings in your router and your DVR can be access the internet.

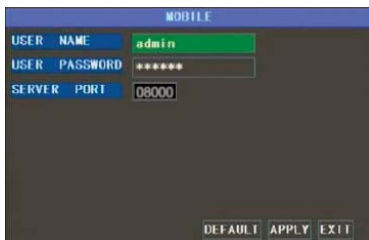

Setting up Mobile in Device under DVR menu, please go to:
[Menu] > [Devices] > [Mobile]

By default, the DVR mobile port is 000000. You need to set up a port for the remote connection, for example:

Port 8000

User Name: admin

Password: 111111

MOBILE	
USER NAME	admin
USER PASSWORD	*****
SERVER PORT	08000

DEFAULT APPLY EXIT

Choose [Apply] before you exit out to the main screen, otherwise your setting is not going to be saved.

Once you set up the DVR, just simply go to your router open the required port. If you have a problem opening ports, please refer to your router's user manual or call the manufacturer representative for more information.

Apps Installation

Create an Apple ID:

Before you start, you need to sign up an account with App Store or use your existing account, if you don't have one, simply open up iTunes and create a new account by following the instruction on-line.

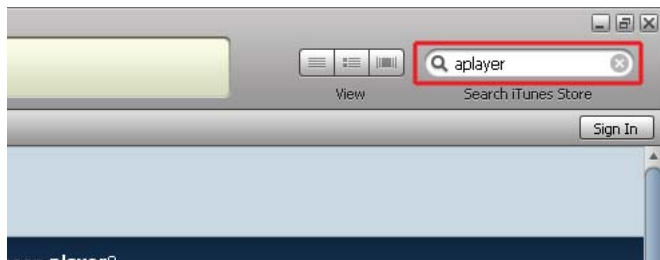

If you don't have iTunes, you may download at apple's website, <http://www.apple.com>

Troubleshooting

Q. My iPhone cannot download Aplayer software?

A. Please make sure you logged in with your Apple ID, and check your phone firmware. Aplayer require firmware version 3.0 + to run.

Q. I cannot find the Aplayer App in App store?

A. You need internet connection in order to browse App Store. Please make sure your phone is connected to internet with EDGE, 3G or WiFi.

Q. I hit connect button, but no videos or fail to connect.

A. Please check if you have the right user name and password entered. To connect, you need at least EDGE connection.

Q. My iPhone connected to my DVR but with slow refresh rate.

A. EDGE is the minimum connection speed for Aplayer to work properly. If you experienced slow refresh rate, either upgrade your cellular data plan or check the download speed with your phone company.

Q. Where is my snapshots saved to?

A. It will saved to your phone's Photo Album. You can email to your email if needed. Please refer to your iPhone user manual to send out email.

Q. I have a PTZ camera connected but no control.

A. Please check the connection in the DVR and make sure you can control the PTZ in your DVR.
